

Configured S3 Bucket Using s3fs on a Linux System

created an s3 bucket-s3bkps

Created IAM user for accessing the s3-

AWS Credentials

access key

AKIA6FBUAJF27HRFEPGD

secret key

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

---->>created user --spot1,spot2,spot3,spot4

___--->>created a group --s3users

----->>add the users to the group s3users

mounted the s3 using the S3FS -----

s3fs s3bkps ~/s3bucket -o allow_other,uid=1000,gid=\$(getent group s3users | cut -d: -f3)

add it in the fstab---

s3fs#s3bkps /home/user/s3bucket fuse _netdev,allow_other,uid=1000,gid=\$(getent group s3users | cut -d: -f3) 0 0

Mount point

s3fs 16E 0 16E 0% /home/user/s3bucket

The mount point is accessible by the 4 user in /home/user/s3bucket
